## PROFESSIONAL SUMMARY

Flutter developer specializing in cross-platform mobile apps for healthcare. At Mediisha, I maintain and enhance a Flutter app that scans barcodes and captures photos of required patient documents (doctor prescriptions and other records) for the hospital's insurance (BIMA) submission workflow, and I support Laboratory Information System (LIS) integration for the lab. Proficient with Firebase, REST APIs, and Cubit state management within Clean Architecture, with a focus on scalable, reliable, and user-friendly solutions.

## TECHNICAL SKILLS

**Languages:** Dart, Python

**Frameworks & Tools:** Flutter, Firebase, Supabase, FastAPI, Git, Jira, ClickUp

**Databases:** Firestore, SQLite, MySQL, MSSQL

**Concepts:** Cross-platform development, Clean Architecture, State management (Cubit/Bloc), REST API integration, Agile/Scrum, Networking (basic)

## WORK EXPERIENCE

**Flutter Developer** | Mediisha

Aug 2025 – Present

- Maintain and enhance a Flutter app that scans barcodes and captures photos of required patient documents (doctor prescriptions and other records), feeding the hospital's insurance (BIMA) submission workflow.
- Support Laboratory Information System (LIS) integration for the lab and work within the hospital's MSSQL-backed platform, connecting the mobile app and lab workflows through REST APIs for reliable data exchange.
- Collaborate cross-functionally to streamline claim and lab workflows and advance healthcare automation.

**Mobile Application Developer (Intern)** | Diyalo Technology

Feb 2025 – Jul 2025

- Enhanced the BusSewa app homepage with new features and implemented full multi-language localization across regions.
- Built secure, efficient API communication using Dio interceptors, applying Cubit state management with Clean Architecture for maintainable, scalable code.
- Integrated Firebase Analytics to track user behavior and app performance, enabling data-driven improvements.

## PROJECTS

**Furniva – AR-Based Furniture Shopping App** — Flutter, Firebase, AR (3D Visualization)

- Developed an augmented-reality app that lets users visualize furniture in real time within their physical space.
- Implemented product browsing, 3D model rendering, and interactive AR placement to check size, position, and design fit.

GitHub: [github.com/Rijan77/furniva](https://github.com/Rijan77/furniva)

**CleanLoop – Smart Waste Management App** — Flutter, Firebase

- Built an app for waste tracking, recycling guides, and community event listings.
- Integrated real-time notifications, pickup scheduling, and gamification features.

GitHub: [github.com/Rijan77/CleanLoop](https://github.com/Rijan77/CleanLoop)

**SkyBook – Flight Search & Booking App** — Flutter, Firebase, Aviation Stack API

- Developed real-time flight search and tracking with live booking capabilities. ([Demo on YouTube](#))

GitHub: [github.com/Rijan77/flight-tracker](https://github.com/Rijan77/flight-tracker)

## EDUCATION

**B.Sc. (Hons) Software Engineering & Computer Engineering**

Jan 2022 – Dec 2025

University of Bedfordshire (PCPS College)

## TRAINING & CERTIFICATIONS

- Flutter Bloc** – Udemy (2025)
- Introduction to Databases** – Coursera (2024)
- Algorithmic Toolbox** – Coursera (2024)
